INNOVATION	EFFICACY	RAPIDITY	SIMPLICITY
Our concept arose to distribute a dry disinfectant fog. Thanks to its particles of 5 $\mu$ , the solution uniformly reach all surfaces.	Provides disinfection by reducing pathogen load 99.9% of the treated environment. A reproducible efficiency at every treatment.	Effective even at low dosage (1 ml / 1 m <sup>3</sup> ). Taking as granted the fast reuse of the treated spaces.	Very easy to program an use. Engineered for compactness, lightness and transportation. No intervention is needed during the treatment.

**83%** of travelers say they prefer to choose an anti allergic room if they have a choice.  
**59%** of travelers choose a hotel over another on the basis of the availability of an anti-allergic room.\*
